SUMMARY

Final-year B.Sc. Computer Science student and ISBM hackathon winner with 7+ months of experience building and deploying AI/ML models and full-stack applications. Active open-source volunteer to Lichess. Seeking an AI/ML or Full-Stack Engineer role.

EDUCATION

- Indira College of Commerce and Science, Savitribai Phule Pune University** July 2023 - April 2026
Expected
B.SC. COMPUTER SCIENCE **GRADE: A+** **CGPA: 8.64/10**

WORK EXPERIENCE

- BluOrigin Media** Dec 2025 - Present
AI / ML Engineer Intern
 - Built and deployed supervised & unsupervised ML models for lead scoring and campaign prediction, automating repetitive analytics and driving measurable improvement in marketing ROI.
 - Designed end-to-end data pipelines (EDA → feature engineering → model deployment) using Python, resulting in zero manual intervention for weekly performance reports.
 - Partnered with marketing and engineering teams to translate complex model outputs into clear business recommendations and dashboards.
- Alfido IT Services** July 2025 - Oct 2025
Python & Web Developer Intern
 - Developed and deployed production web applications, reduced third-party API costs by 100% by building an in-house solution.
 - Managed full lifecycle of 7+ major API updates with zero downtime, improving system performance and reliability for live clients.

SKILLS

- Languages:** Python, Java, C, SQL.
- AI/ML:** GenAI, TensorFlow, PyTorch, OpenCV, LLM, RAG Pipelines.
- Web Tech:** JavaScript, PHP, CSS, HTML.
- Data:** Pandas, NumPy, Scikit-learn, Matplotlib.
- Tools & Infra:** AWS, Docker, Git, Linux, VS Code.

KEY PROJECTS

- Agrarian Distress & Suicide Risk Predictor (Python, XGBoost, Scikit-learn, Pandas, Data Visualization)** [Video Link](#) [GitHub](#)
 - Designed and trained a predictive model on socioeconomic, agricultural, and climate data to identify farmers at high risk of distress and suicide in Maharashtra, giving government agencies a practical tool for early intervention and policy-making
 - Built a complete end-to-end solution that combines data analysis with clear visualizations for real-world agricultural decision support
- AI-Powered Pothole Detection & Reporting System (YOLOv5, OpenCV, Geolocation API, SMTP Automation)** [Hackathon Win](#) [GitHub](#)
 - Developed a real-time computer vision system that detects potholes on roads, captures GPS location, and automatically sends email alerts to the Pune Road & Transport Department for immediate repair
 - Created a fully functional prototype that bridges computer vision with government infrastructure, solving a daily safety problem for citizens
- Virtual Rebirth - MIT-WPU Hackathon (Llama 3.2, FastAPI, Ollama, NLP)** [Demo Website](#) [GitHub UI](#) [GitHub](#)
 - Built a completely offline 3D avatar system with real-time lip-sync, contextual memory, and natural voice interaction that runs without any internet or cloud services
 - Demonstrated a privacy-first, zero-trust AI experience that feels like talking to a real person, showcased live at MIT Hackathon

PUBLISHED RESEARCH PAPERS

- INTERNATIONAL JOURNAL OF INNOVATION SCIENCE** [Download Link](#) [DOI](#) [GitHub](#)
- Machine Learning–Augmented Neurosymbolic AgenticOps Framework for Runtime Verification and Enforcement...

ACHIEVEMENTS & AWARDS

- ISBM Hackathon 1st Place
- Community Volunteer @Lichess
- Vice President at Rotaract club of IC
- Rotaract “Best Board of Director” Award
- Pune District Wrestling Champion
- District Level Chess Medalist

COURSES & CERTIFICATIONS

- IBM - Developing AI Application using Python and Flask
- Cloud Computing With Amazon Web Services
- Web Development Full Course
