SUMMARY

Full Stack Developer & AI/ML Engineer Intern | Open Source Contributor @ Lichess (worlds top 2 chess organization) Results-oriented developer with a proven track record in AI/ML and Python back-end systems. Combining strong data analysis skills with hands-on experience in model architecture and global-scale open-source project. Committed to delivering high-value, end-to-end solutions for complex digital environments.

EDUCATION

- Indira college of commerce and science** July 2023 - Present
Bachelor of Science in Computer Science Grade: A+ || CGPA: 8.64/10

WORK EXPERIENCE

- BluOrigin Media** Dec 2025 - Present
AI / ML Engineer Intern
 - Developed and deployed AI/ML models to optimize digital marketing performance, specifically focusing on lead scoring and campaign performance prediction using supervised and unsupervised learning techniques.
 - Engineered data pipelines for structured and unstructured datasets by performing Exploratory Data Analysis (EDA) and feature engineering, resulting in the automation of repetitive analytical tasks and improved decision-making accuracy.
 - Collaborated with cross-functional teams (developers and marketing strategists) to translate complex technical insights into actionable business recommendations using Python-based libraries and data visualization tools.
- Alfido IT Services** July 2025 - Oct 2025
Python & Web Developer Intern
 - Technical intern as Python & Web Developer with of hands-on experience in dynamic web application development.
 - Eliminated 100% of third-party API operational costs by developing open source optimization solution.
 - end-to-end deployment lifecycle and deploying over 7 iterative updates in the work period.

SKILLS

- Languages:** Python, Java, C, SQL, TypeScript.
- AI/ML:** GenAI, TensorFlow, PyTorch, OpenCV, LLMs, RAG Pipelines.
- Web Tech:** Next.js, React, Node.js, PHP, Tailwind, HTML.
- Data:** Pandas, NumPy, Scikit-learn, Matplotlib.
- Hardware:** Arduino, Raspberry Pi, ESP32, IoT.
- Tools:** AWS, Git, Linux, VS code, Neo-vim, Docker.

RECENT PROJECTS

- Agrarian Distress & Suicide Risk Predictor (Python, XGBoost, Scikit-learn, Pandas, Data Visualization)**
Designed and trained a predictive model to analyze complex socioeconomic, agricultural, and climate data. The model identifies key risk factors contributing to farmer distress, providing a potential tool for proactive policy-making and early intervention. Achieved a 92% F1-Score in identifying key risk factors.
- AI-Powered Pothole Detection & Reporting System (YOLOv5, OpenCV, Geolocation API, SMTP Automation)**
Engineered a real-time computer vision system using YOLOv5 and OpenCV to detect road hazards with 95% mAP. implemented a geo-tagging module to capture precise GPS coordinates of detected potholes and developed an automated email alert pipeline that instantly notifies the Road & Transport Department for rapid infrastructure maintenance.
- LogicGuard: ML-Augmented Neurosymbolic Framework for AI Safety (TLf, DFA, GPT-4, MONA, Proxy Design Pattern)**
Engineered a hybrid Neurosymbolic architecture that integrates stochastic Large Language Models (GPT-4) with deterministic Formal Verification (LTLf) to enforce strict adherence to Standard Operating Procedures (SOPs). Implemented a runtime enforcement layer using Finite State Automata (DFA) and MONA to monitor and intercept LLM outputs, effectively eliminating "Logic Drift" and hallucination-based errors.
Applied the Proxy Design Pattern to create a seamless security middleware, resulting in a 93% reliability rate for mission-critical tasks and a 53.3% reduction in logic-based security vulnerabilities.
Published findings in the International Journal of Innovation Science, demonstrating the framework's ability to transform non-deterministic AI into production-ready "AgenticOps" systems.

PUBLISHED RESEARCH PAPERS

INTERNATIONAL JOURNAL OF INNOVATION SCIENCE

- Machine Learning–Augmented Neurosymbolic AgenticOps Framework for Runtime Verification and Enforcement of Standard Operating Procedures

ACHIEVEMENTS & AWARDS

- Intercollege Hackathon 1st Place
- Community Volunteer @Lichess
- Vice President at Rotaract club of IC
- Best Board of Director Award
- Pune District Wrestling Champion
- District Level Chess Silver Medal

COURSES & CERTIFICATIONS

- IBM - Developing AI Application using Python and Flask
- Cloud Computing With Amazon Web Services
- Web Development Full Course
